

CYBERSECURITY AND CYBERDEFENCE
TRUST SERVICE PROVIDERS IN FRANCE

31 March 2015

Regularly updated list available on ANSSI's website – www.ssi.gouv.fr

Contact: qualification@ssi.gouv.fr

QUALIFICATION OF TRUST SERVICE PROVIDERS

In order to facilitate access of administration¹ and national critical operators² to highly efficient and trust cybersecurity and cyberdefence services, France has established a challenging and efficient process allowing the qualification of “trust service providers”.

Based on the savoir-faire of expert qualification bodies accredited by COFRAC³ and licensed by ANSSI⁴, a rigorous evaluation process allows the qualification of candidate providers meeting the adequate security requirements. Candidate providers can apply for one or all services covered within the scope of the evaluation.

As of today, several trust service providers for IT security audits – listed below – have already been qualified while several others are being evaluated.

While their technical requirements are currently being elaborated, including via public consultations, qualified trust service providers for incident detection, incident response and Cloud will be soon available on ANSSI’s website.

¹ Article 9 of ordinance n°2005-1516 of 8 December 2005, Référentiel général de sécurité.

² Article 22 of the Military Programming Law, n°2013-1168, 18 December 2013

³ France’s National Accreditation Body.

⁴ ANSSI (Agence nationale de la sécurité des systèmes d’information) is the French cybersecurity agency. It is France’s authority for network and information security and cyberdefence.

STATUS OF THE QUALIFIED TRUST SERVICES PROVIDERS ROADMAP

TRUST SERVICE PROVIDERS FOR IT SECURITY AUDITS		
SCOPE OF THE EVALUATION	✓	Architecture audit
	✓	Configuration audit
	✓	Source code audit
	✓	Penetration test
	✓	Physical and organizational audit
