

# ECSS

EUROPEAN CYBER SECURITY ORGANISATION

## ECSSO activities in support of the EU Cybersecurity Act

**Dr. Roberto G. Cascella**

ECSSO Secretariat

Cybersecurity Standardization Conference 2021

– Online, 4 February 2021 –

# Market and geopolitical environment

- **Global cybersecurity market** (estimation: ECSCO 2018 market analysis): 115 bln € / Market growth rate + 13% by 2022.
- Market dominated by **global suppliers** from North America and Asia: most of the IT hardware and software products are manufactured outside the European Union
- **EU market** about 25 bln € composed by about 12K supplier companies (74% of them are Micro and SMEs).
- **EU public procurement** still leveraging upon non-EU solutions, even for sensitive issues.
- Growing “**sovereignty**” issue (in particular after the COVID with digital transformation)

2018 Cybersecurity market by Country--

There is innovation in Europe, but still fragmented markets

# ECSO Working Groups (WG) collaborating with each other: Cybersecurity 360°

# WG1

## Standardisation, Certification, and Supply Chain Management

Support the roll-out of EU ICT security certification schemes, standard and legislation recommendations (MoU with ETSI, CEN/CENELEC, collaboration with EC, ENISA and JRC, member of the SCCG) and the establishment of trusted supply chains.

Define methodologies and approaches. Provide guidelines & recommendations on policies.

Cooperation with EU bodies (EC, ENISA, SCCG, MSP, CEN/CENELEC, ETSI ...)

### Connected Components

Work on the inter-relationship (“composition”) of EU scheme certified components based on standards for trusted supply chain and product certification in line with to the EU Cyber Act.

### Digital Services and Systems

Understand the systems’ & services’ dependencies, needs and current approaches for risk management and operational aspects

**Cybersecurity ecosystem: stakeholders, market and regulations**

**WG1**

**WG1 – Standardisation, Certification, and Supply Chain Management**

New work item (forthcoming)

ECSO member of SCCG

MoU with CEN CENELEC & ETSI

Work with EC and ENISA

**Support to Policy implementation**

**Consistency of the legislative framework and Cybersecurity Act (cooperation with ECSO Legal and Regulation Task Force)**

## *The value of certification: important factors*

- Digital transformation and increase reliance on new technologies
- Trusted supply chain to ensure business and service resilience
- Build trust via future European cybersecurity certification schemes across industries
  - Encourage, define, monitor, assess and help companies improving the overall security of their products
  - Calibrate security controls according to the risk-based assessment
  - Horizontal schemes to support sector specific needs
- Whole lifecycle, management of vulnerabilities and risk, etc.
  - Assessment of the security claims according to the desired assurance level
  - Surveillance of certified products and certificate validity lifecycle

## *Areas of interest for future certification*

- Some areas highlighted by ECSO members are:
  - SDL/Secure Development Lifecycle process
  - 5G Component, product (SW, HW), systems and services
  - Industrial and consumer IoT devices
  - Healthcare devices, services, organisations
  - Industrial environments
  - Smart Buildings
  - Critical infrastructure and ICS/SCADA devices

# European Cyber Security Organisation

Established in 2016 for the implementation of the contractual Public-Private Partnership (cPPP) on cyber security with the European Commission

Our membership has grown **from 132 members** in June 2016 **to 255 members across 29 countries** in January 2021, connecting more than 2000 organisations in Europe

# Since 2016 ECSO has been addressing several building blocks through its Working Groups

# ECSO Working Groups (WG) collaborating with each other: Cybersecurity 360°

**WG3** - Engage directly with users (operators, companies, governments) to **understand cyber threats, share information among trusted peers, link supply and demand**, and act as a **transversal WG** that defines needs of the sectors for standardisation / certification; education, training and exercises; research / technologies; local / regional initiatives.

**WG5** - Contribute towards a cyber security **competences and capacity building effort** for the European digital agenda, through increased **education, professional training and skills development**, as well as actions on **awareness-raising** and **gender inclusiveness**.

**WG2** - Provide **market intelligence & qualitative analysis**, facilitate the **visibility of European solutions** across Europe and beyond, and boost the level of private **investments** in cybersecurity market and its solutions.

## USERS & OPERATORS REQUIREMENTS

**WG3 : SECTORAL DEMAND**  
(INDUSTRY 4.0 & ICS, ENERGY, TRANSPORT, FINANCE, PUBLIC SERVICES & EGOV, HEALTHCARE, SMART CITIES, TELECOM, MEDIA & CONTENT)  
29 countries • 330+ experts

## EDUCATION & TRAINING AWARENESS, CYBER RANGES

**WG5 : EDUCATION, TRAINING, AWARENESS AND CYBER RANGES**  
29 countries • 270+ experts

**WG2 : MARKET DEPLOYMENT, INVESTMENTS & INTERNATIONAL COLLABORATION**  
28 countries • 330+ experts

## R&I

**WG6 : STRATEGIC RESEARCH & INNOVATION AGENDA (SRIA) AND CYBER TECHNOLOGIES**  
29 countries • 400+ experts

## TESTING, CERTIFYING & VALIDATING PRODUCTS, AND SYSTEMS

**WG1 : STANDARDISATION, CERTIFICATION AND SUPPLY CHAIN MANAGEMENT**  
28 countries • 330+ experts

**WG4 : SUPPORT TO SMEs AND REGIONS**  
26 countries • 180+ experts

**WG6** - Define the cyber security **EU R&I roadmap and vision** to strengthen and build a resilient EU ecosystem. Analyse the **challenges of digitalisation** of the society and industrial sectors to sustain EU **digital autonomy** by developing and fostering **trusted technologies**.

**WG1** - Support the roll-out of **EU ICT security certification schemes, standard and legislation recommendations** (MoU with ETSI, CEN/CENELEC, collaboration with EC, ENISA and JRC, member of the SCCG) and the **establishment of trusted supply chains**.

**WG4** - Help SMEs to **create more market transparency** and to reach out far beyond their traditional home markets to partner in R&D international project and to **access European market**.

**Engage with Regions specialised in cybersecurity** to support the implementation of an innovative Smart Commercialisation Strategy

## MARKET DEPLOYMENT

# WG1 already available work

To foster trust in digitalization and promote innovation

**ECSO Meta-Scheme Approach** helps to harmonise minimum security requirements, define a unified levelling across verticals, and provide a common way to define required security claim

➤ <https://www.ecs-org.eu/documents/publications/5a3112ec2c891.pdf>

It can act as a methodological tool to structure the landscape, “glue” together the existing schemes and specify additional steps

**ECSO Assessment options** explains how to benefit from the right mix of security assessments, and what constraints to be aware of

➤ <https://www.ecs-org.eu/documents/publications/5d6fbbd00cfe7.pdf>

It provides insights to organisations that are building their cybersecurity capabilities and need to choose how to assess security

**ECSO State of the Art Syllabus** gives an overview of existing certification schemes & standards: products & components; ICT services; Systems; Vertical Sectors; etc.

➤ <https://www.ecs-org.eu/documents/publications/5a31129ea8e97.pdf>

It provides a cartography in standardization – currently under revision – new version coming soon!

**ECSO Product Certification Composition** addresses composition in an agnostic way with respect to standards and certification schemes to create an environment favourable for re-use of certification evidence

➤ <https://ecs-org.eu/documents/publications/5fbfc8436e5a1.pdf>

It provides guidelines and structure how to proceed when seeking a certification by composition under the requirements defined by EU Cybersecurity Act

**ECSO challenges for the roll-out of the Cybersecurity Act** focuses on how to achieve framework consistency, what is intended for composition and the related challenges for a system integrator, and on the areas of interest for future priorities

➤ <https://ecs-org.eu/documents/publications/5fd787e5cae1c.pdf>

It discusses the aspects that could hinder the usage of future European cybersecurity certification schemes across industries

# ECSO Product Certification Composition

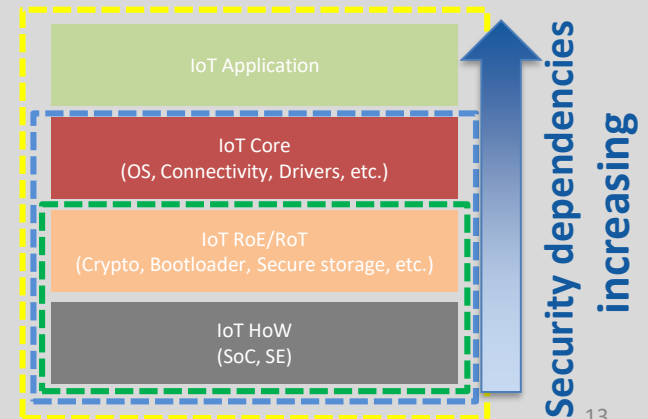

European Cyber Security Certification  
Product Certification Composition  
WG1 – Standardisation, certification and supply chain management  
November 2020

Available at <https://ecs-org.eu/documents/publications/5fbfc8436e5a1.pdf>

- **Enable** efficient **re-use** of **certificates** and **evaluation evidence**
- **Decrease** certification **cost** and **improve** overall process **speed**
- Benefit horizontal components **specialised in application** domains
- Strongly **contribute** on the **time to market** of certified products

- **Composition document** – underlying principles and practical aspects
- Initial considerations for composition:
  - Bottom-up, top-down, mix
  - Within the **same** scheme (standard) or **multiple** schemes
  - Component tightly **integrated** or **independent**
- **Guidelines** for certification composition and steps
- Component certification elements that might be necessary for **assessment**

### OBJECTIVES 2021

- Extend the composition across EU schemes, focus on the technical details of the composition approach: the operational phase (e.g. vulnerability and patch management) of the composed product and expectations for product composition. Link with first EU certification schemes.
- Study secure system and service lifecycle and associated risk management and certification.
- Identify the challenges for SMEs in using certification schemes and define guidelines / best practices.
- Address the challenges for a trusted supply chain and management of the risks.
- Support policies implementation: link with DEP priorities describing challenges and plan for the future. Development of capabilities.
- Continue the collaboration with ENISA, EC, European SDOs and other relevant stakeholders.
