Growing demand of cyber professionals

- > National and EU wide growing demand in cyber talent
- > Understanding the demand of labour market and the 'supply' of education in depth is needed to develop and implement the right actions.

Cybersecurity education and labour market research

- > Education vs Labour market demands
- > ECSF
- > (mis) match supply & demand

How did we analyse the labour market demand?

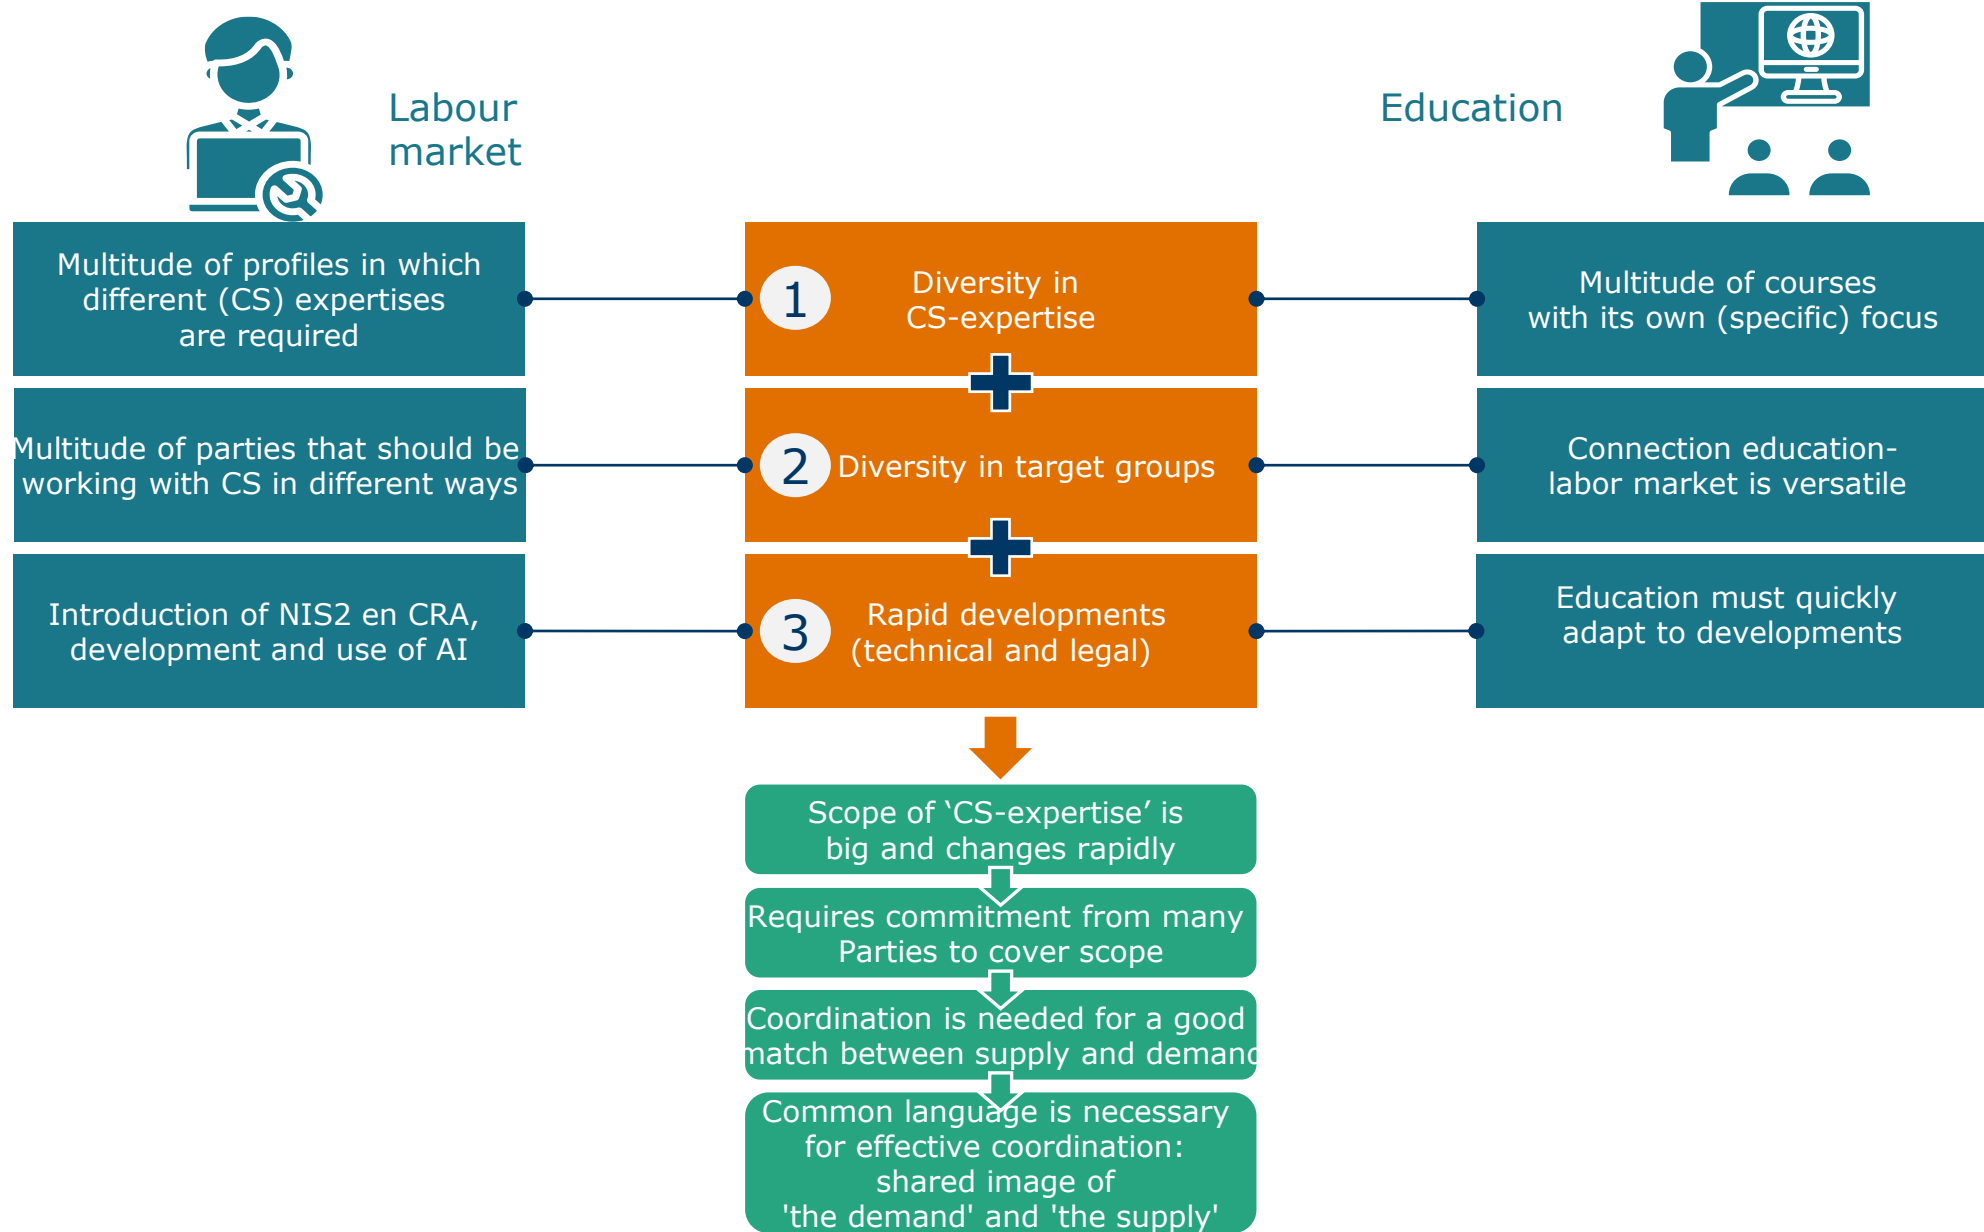

Outcomes: job vacancies

- Different profile Small CS - component
- Different Profile, Substantial CS - component
- ECSF profile, difference in tasks
- True match with ECSF profile

Outcomes: (mis) match labour market & education

Recommendations & next steps

Coordinated approach:

- Integration with the existing Human Capital Agenda ICT
- Coordinated plan of action to define **meaningful** and **actionable** next steps for all recommendations.
- Set up task force Human Capital Cybersecurity
 - Representation from Education, Research, Government & Labour Market.

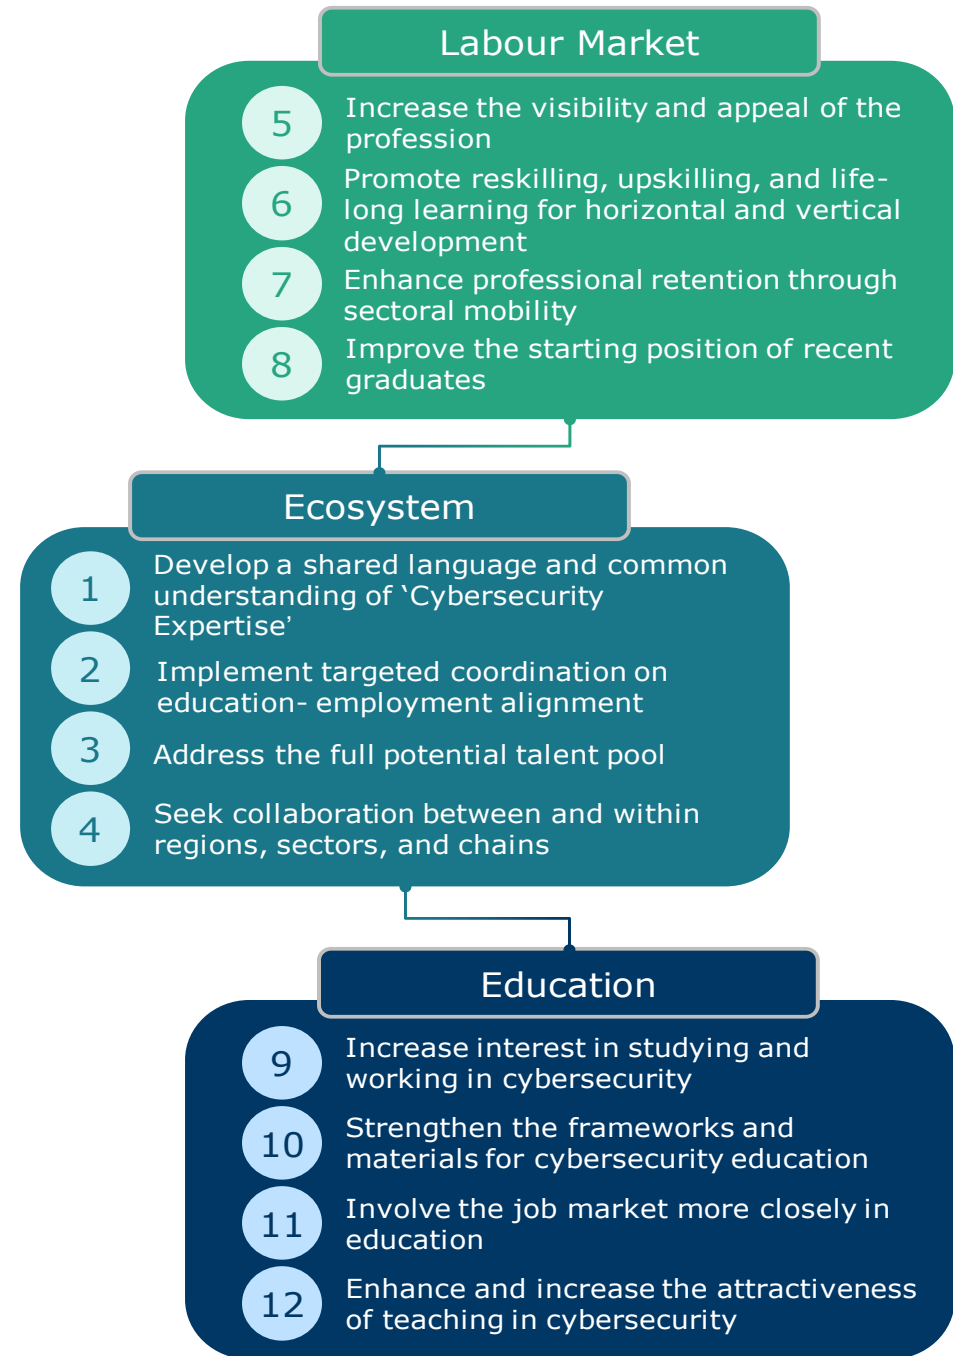

Fixing the basics

- Provide more **insight** into the cybersecurity talent gap and best practices (initiatives)

Support building partnerships (knowledge institutions & organizations)

- Exploring instruments to support building partnerships with the goal to match education better with the needs of businesses

These are first next steps. Together with the Task Force and the broader CS ecosystem within NL concrete actions (initiatives) will be formulated and implemented in upcoming years.

Thank you for your attention

Are the best practices from your country you would like to share?
Lets inspire each other!
