NIS 2

NATIONAL TRANSPOSITION IN FRANCE

1. FRENCH AMBITIONS FOR NIS 2

Main objectives for France in this transposition :

- Create a regulatory framework with a strong impact on the cybersecurity of the entities;
- Actively participate in workstreams aiming to harmonize NIS 2 among member states
- Take into account the great diversity of the entities that will enter the NIS 2 directive
- Keeping the sectors informed during the transposition
- Take into account feedbacks from the sectors

ANSSI will also evolve with NIS 2

As national authority, and regulator, ANSSI **has to offer support to any entities under NIS 1**, and tomorrow, **under NIS 2**. However, there is also a need for further **control**, and if needed the power to **sanction**.

ANSSI will also have to **face a challenge regarding the number of entities** : the services offered by the Agency will have to serve thousands of entities. It is thus necessary to :

- Adapt ANSSI support to the new entities regulated by NIS 2 ;
- Develop digital services ;
- Develop local and industrial intermediaries.

THE MAIN STEPS TOWARD NIS 2 FRENCH TRANSPOSITION

CONSULTING THE HEALTH SECTOR

- ANSSI's consultation is structured around three approaches :
 - **The perimeters of the regulated entities**
 - **Relations between regulator and regulated entities**
 - **Cybersecurity measures**
- In order to cover as much entities as possible, ANSSI is consulting professional federations among the different sectors as well as the Ministry of Health
 - **The French Ministry of health has been consulted and is providing relevant sectorial expertise and information**
 - **On the 13th of September, a first consultation webinar took place with the federations**

CONSULTING THE HEALTH SECTOR

PERIMETER

Objectives :

- **Clarify the perimeter and the definitions mentioned in the Directive**
- Make sure the definitions are shared by the Agency and sectorial actors

- Answer questions such as :
 - « Am i concerned by the directive ? »
 - « Am I an **Essential Entity** or a **Important Entity** ? »

CONSULTING THE HEALTH SECTOR

RELATIONS BETWEEN REGULATOR AND REGULATED ENTITIES

Objectives

- Define how the informations will be shared between both parties :
 - How to notify the entities they are part of NIS 2
 - How to share informations and updating contacts
 - **How to declare incidents**
 - **How ANSSI shares informations toward regulated entities**
- Answer questions such as :
 - « What should I communicate, how ? »
 - « What tools and document could I receive from ANSSI ? What answer to give ? »

CONSULTING THE HEALTH SECTOR

CYBERSECURITY MEASURES

Objectives :

- Inform and exchange about the modalities to reach the cybersecurity objectives
 - Methods
 - Timeline
 - How to reach conformity
- Answer questions such as :
 - « What should I put in place ? »
 - « How should I implement the measures ? »
- Feedback from how the entities implemented the 23 rules from the NIS 1 directive

ANY QUESTIONS ?
