A CYBERSECURITY SECTOR SKILLS ALLIANCE

2ND EUROPEAN
CYBERSECURITY
SKILLS CONFERENCE

The project Cybersecurity Skills Alliance – A New Vision for Europe, in short REWIRE, is co-funded by the ERASMUS+ programme of the European Union.

REWIRE aims to build a Blueprint for the Cybersecurity industry and a concrete European Cybersecurity Skills Strategy. Its work focuses on delivering concrete recommendations and sustainable solutions that will lead to the reduction of skill gaps between industry requirements and sectoral training provision and contribute to the growth, innovation and competitiveness of the Cybersecurity sector.

REWIRE designs to the ECSF

– WP3 Design of the European Cybersecurity Blueprint

R3.3.1 Cybersecurity skills Framework (Public) – [Download the PDF](#)

This deliverable presents the REWIRE Cybersecurity Skills Framework, drawing on ENISA skills framework version 2 (draft version 0.5), considering the classification of European Skills, Competences, Qualifications and Occupations (ESCO) and other existing competence frameworks.

R3.4.1 Mapping the framework to existing courses and schemes (Public) – [Download the PDF](#)

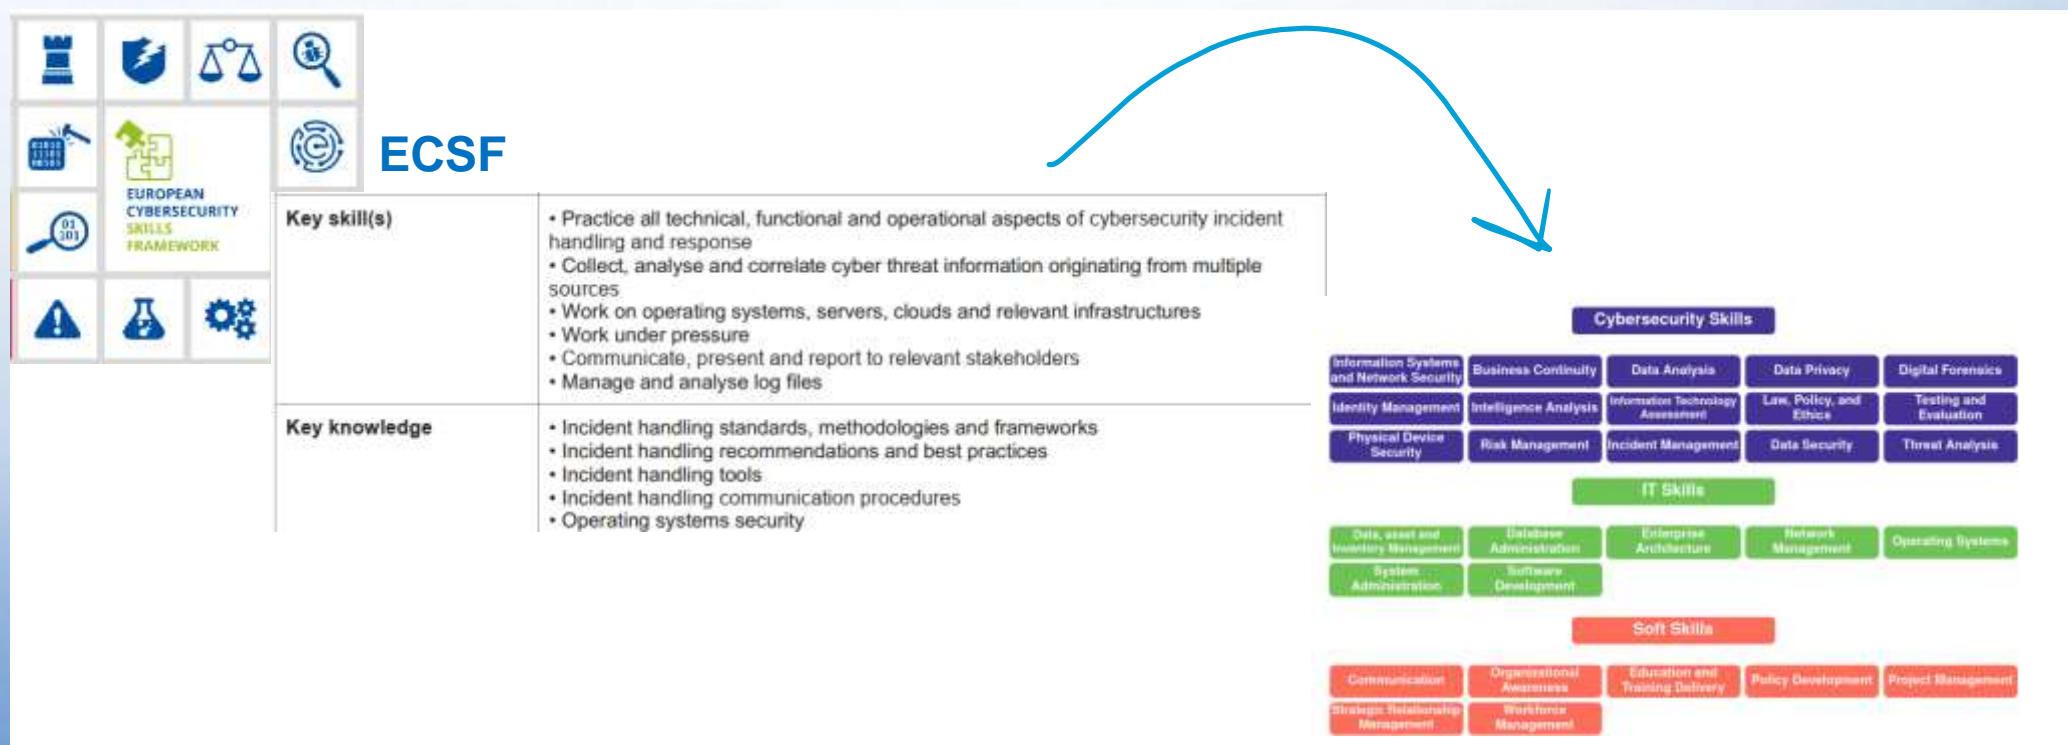

This deliverable deals with the mapping of existing cybersecurity training courses, universities curricula, and certification schemes to the ENISA cybersecurity framework. To make the mapping possible, REWIRE groups are introduced that also allow a better understanding and analysis of the ENISA framework. Moreover, a new web application, namely the Curricula Profiler, is proposed since provides an easier and more user-friendly mapping of skills and existing courses than a Portable Document Format (PDF) report.

R3.5.1 Cybersecurity career pathway analysis (Public) – [Download the PDF](#)

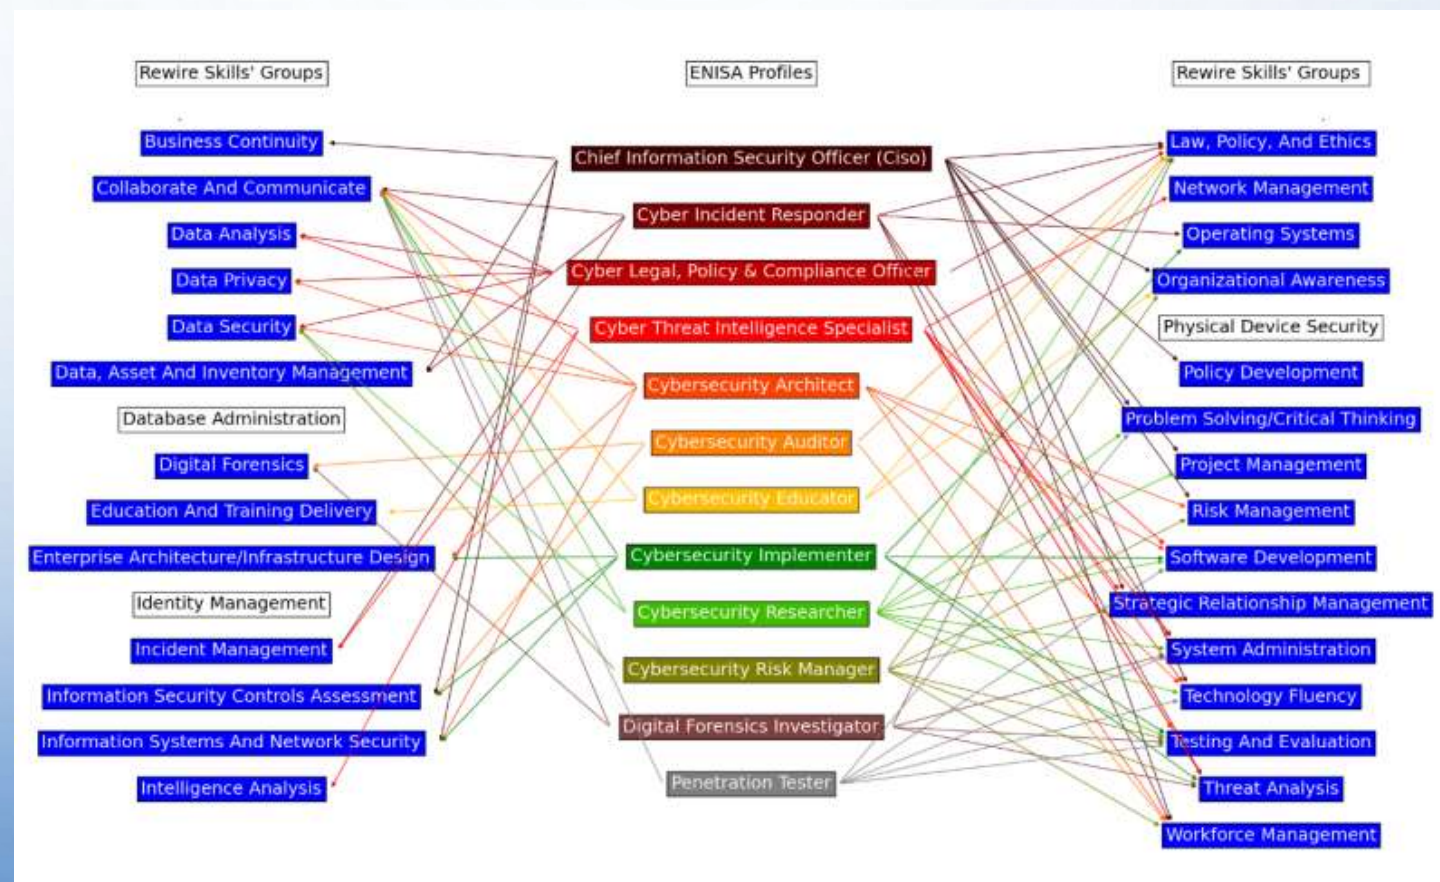

This deliverable contains the results of the analysis of the 12 role profiles that fed into the European Cybersecurity Skills Framework, with the aim to identify the interconnections between them. The interconnections and relationships between the roles is a crucial step for the development of the career pathways or career propagation paths.

REWIRE builds to the ECSF

Four courses have been created and the REWIRE VLE is currently being suitably populated.

The courses contain:

- reading materials
- videos
- presentations and
- exercises (some of them administered through the REWIRE cyber range)

REWIRE builds to the ECSF

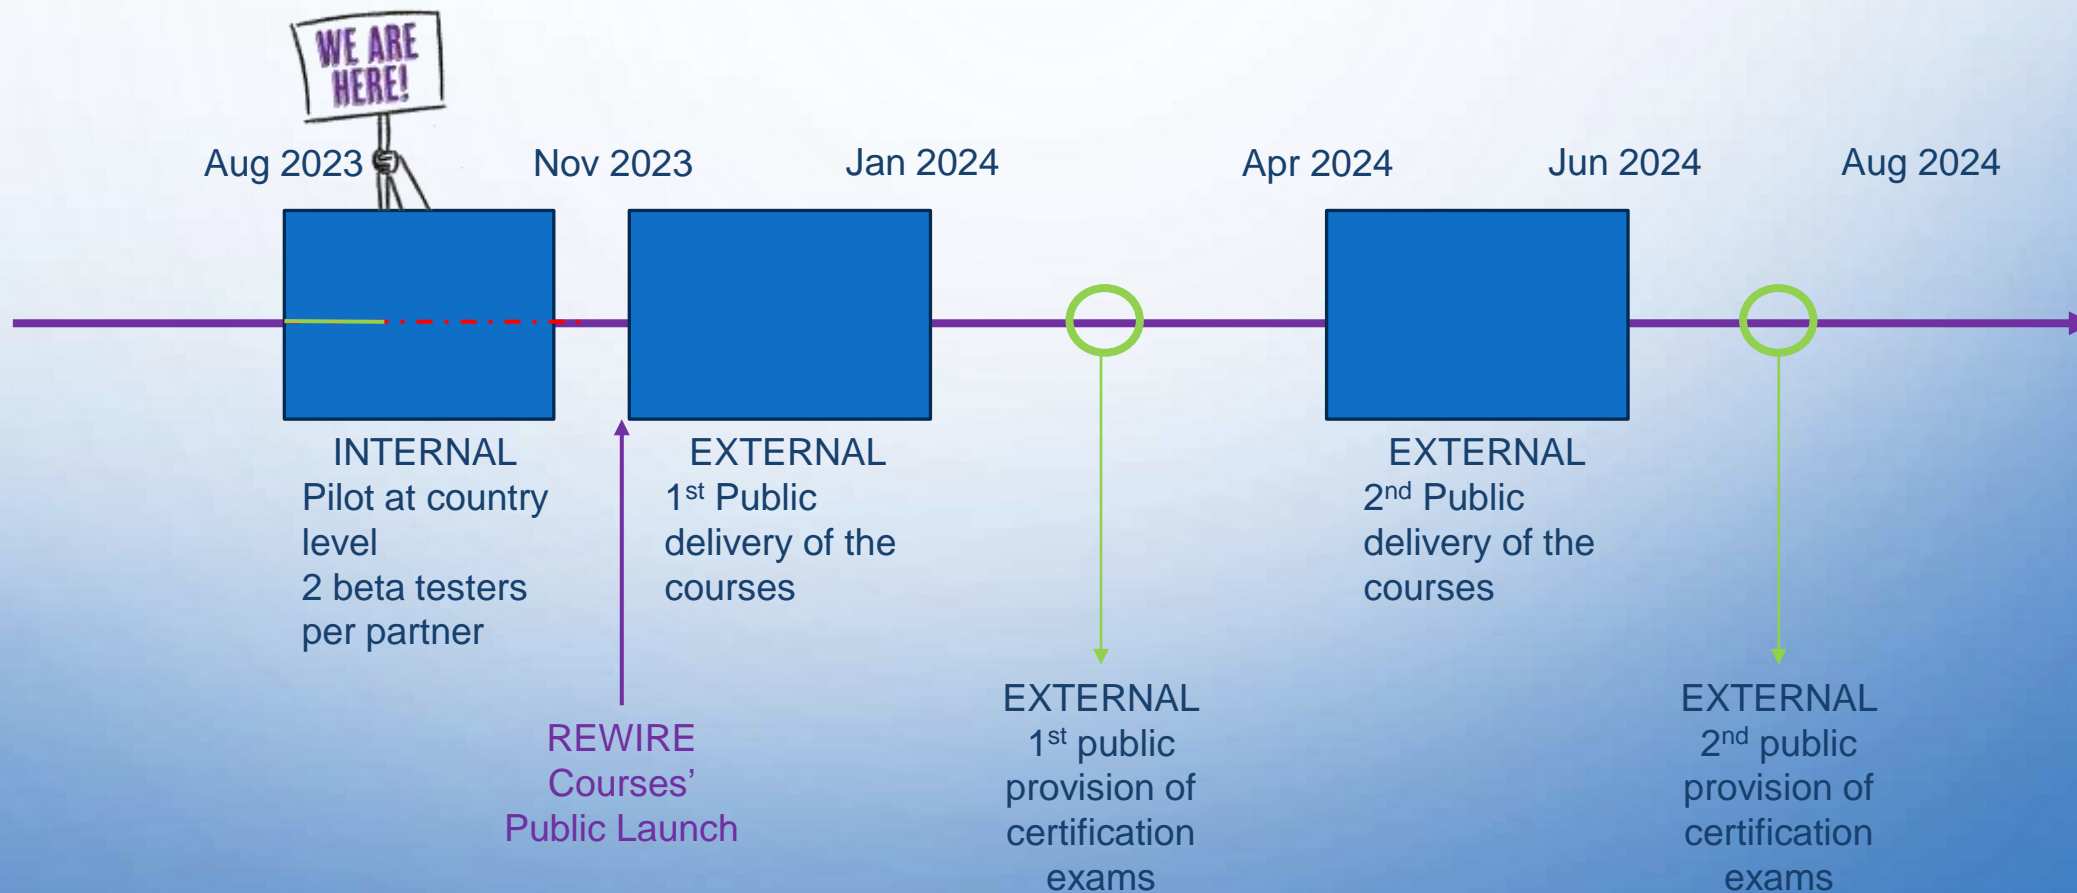

Four certification schemes have been created and an online examination system is currently being suitably populated.

The certification schemes are aligned to ISO 17024 and are supported by

- core processes
- documents
- theoretical examination items
- practical examination items (cyber range)

REWIRE maps the ECSF

ESCO

420 skills were identified of which 92 were proposed as new.

■ New ■ Existing

320 knowledge items were identified of which 95 were proposed as new.

■ New ■ Existing

The following diagrams depict the distribution of the skills of the 12 ECSF profiles to the high level hierarchy of ESCO. (The color bars below each hierarchy item show the percentage of the skills mapped to this item – this relates to the sum of the skills for all 12 ECSF profiles).

S - skills

S1 - communication, collaboration and creativity

S2 - information skills

S3 - assisting and caring

S4 - management skills

S5 - working with computers

S6 - handling and moving

S7 - constructing

S8 - working with machinery and specialised equipment

T - transversal skills and competences

T1 - core skills and competences

T2 - thinking skills and competences

T3 - self-management skills and competences

T4 - social and communication skills and competences

T5 - physical and manual skills and competences

T6 - life skills and competences

THANK YOU
