

# Sharing of (personal) data in the light of the European data strategy – risks and safeguards

Marit Hansen

Data Protection Commissioner  
+ Information Commissioner  
Schleswig-Holstein, Germany

Brussels, 7 October 2022

# Overview

1. Data sharing – new mindset from the EU
2. Learning from Freedom of Information practices
3. Risks ...
4. ... and safeguards:  
How to implement “fair data sharing by design”?
5. Conclusion

# European Data Strategy

## The EU will create a single market for data where:

- Data can flow within the EU and across sectors, for the benefit of all;
- European rules, in particular privacy and data protection, as well as competition law, are fully respected;
- The rules for access and use of data are fair, practical and clear.

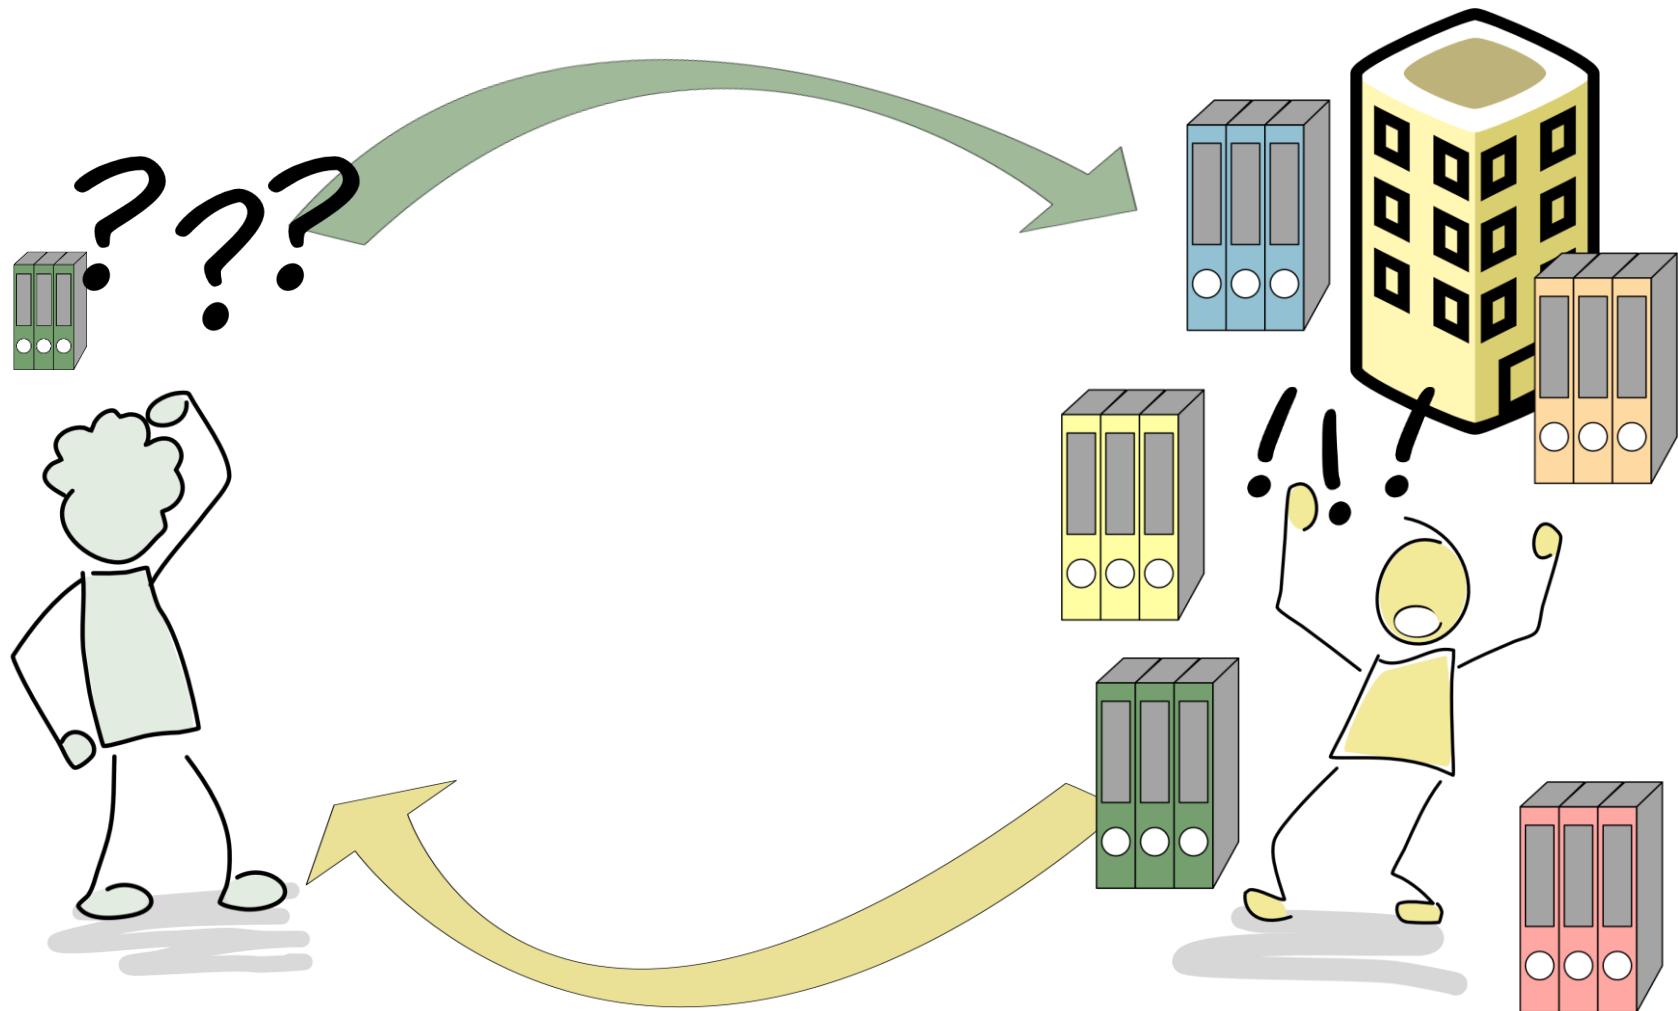

Creating a single market for data will make the EU more competitive globally and will enable innovative processes, products and services.

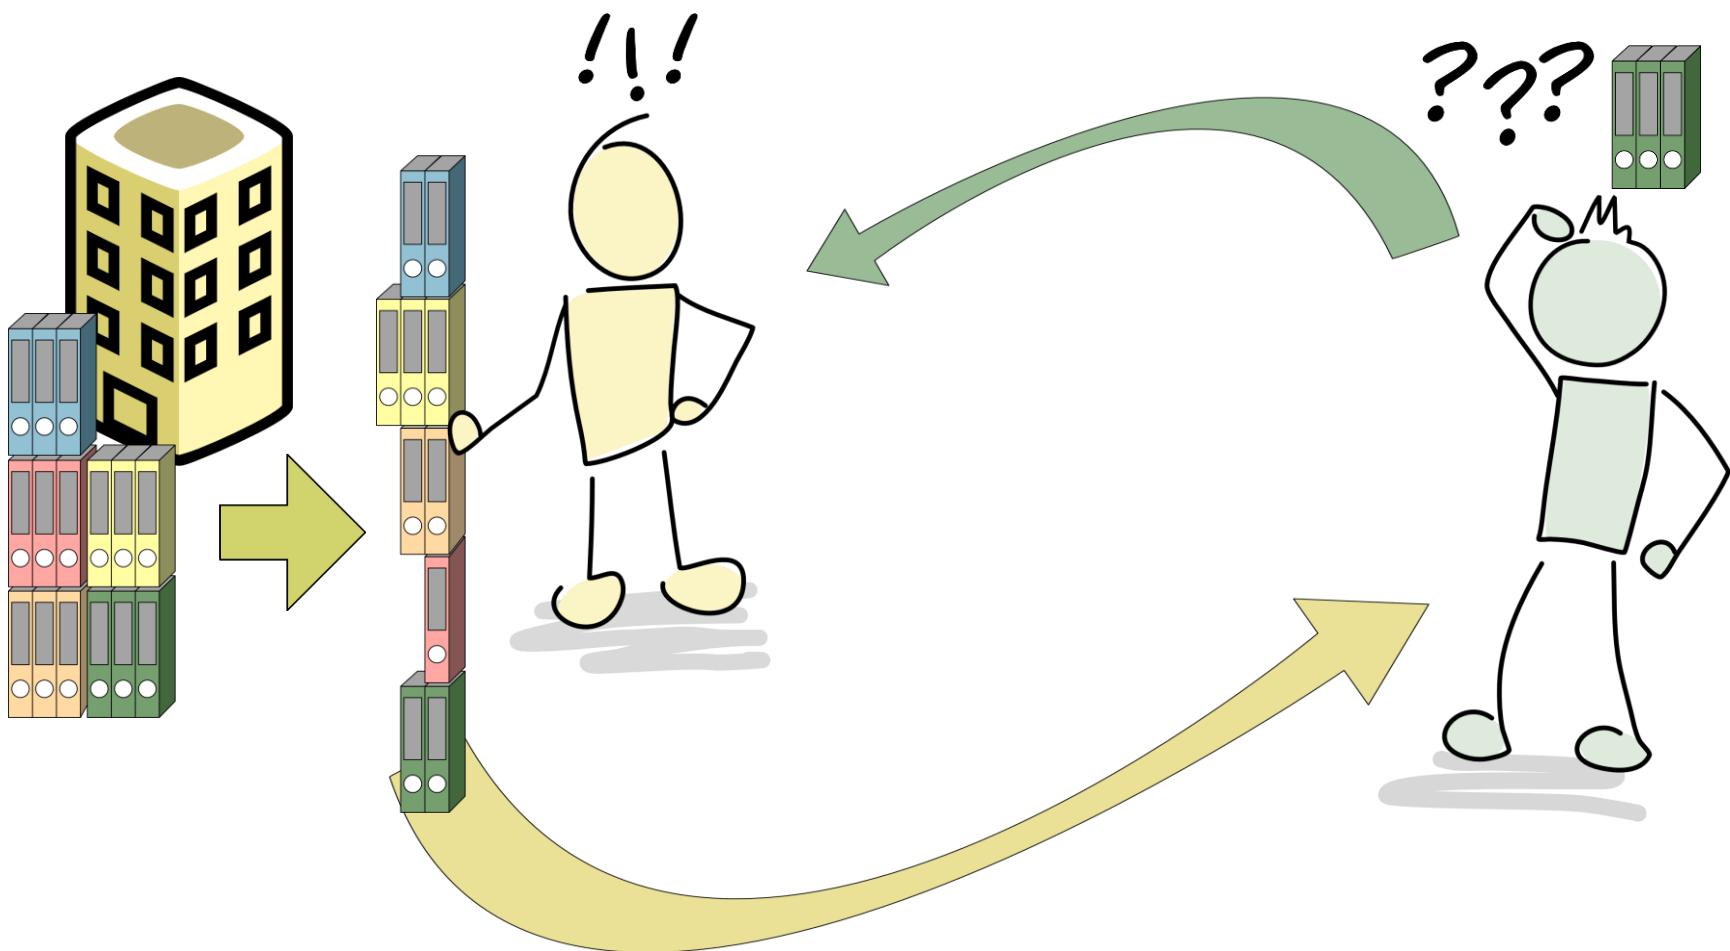

# Overview

1. Data sharing – new mindset from the EU
2. Learning from Freedom of Information practices
3. Risks ...
4. ... and safeguards:  
How to implement “fair data sharing by design”?
5. Conclusion

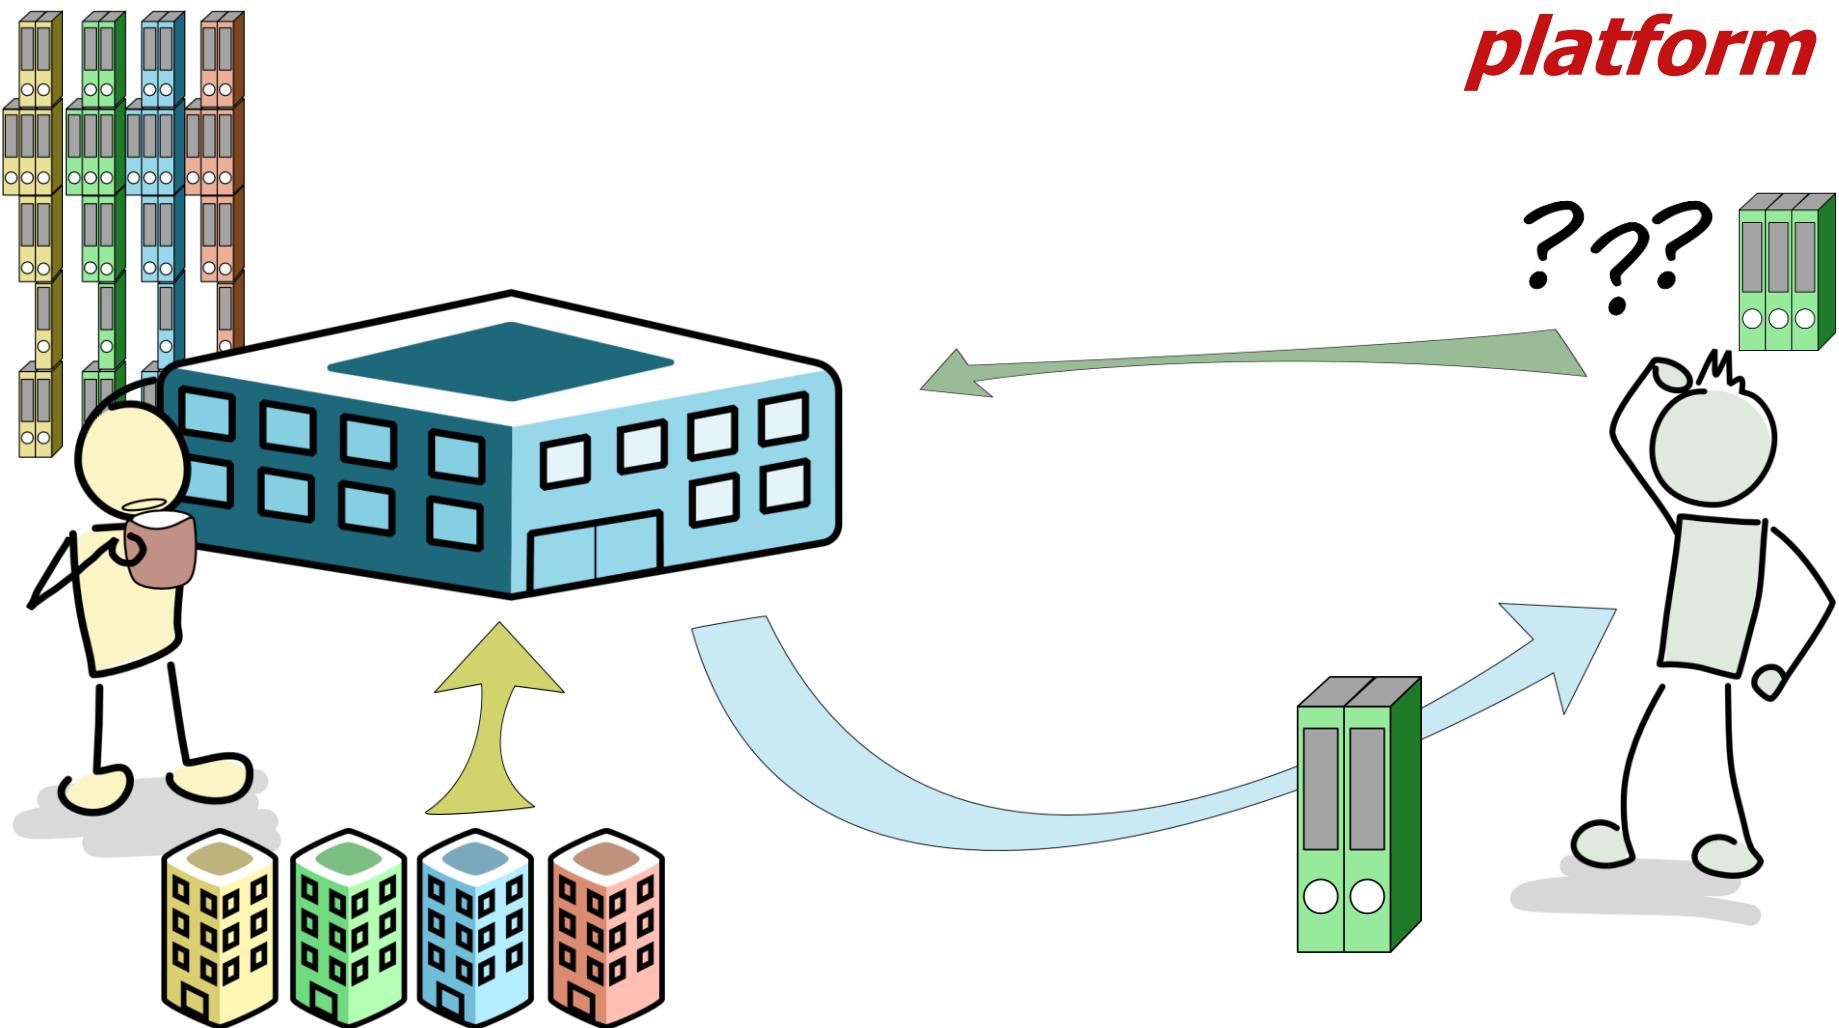

# *Freedom of information request to Gov I*

# *Freedom of information request to Gov II*

# *Freedom of information request to Gov platform*

# Overview

1. Data sharing – new mindset from the EU
2. Learning from Freedom of Information practices
3. Risks ...
4. ... and safeguards:  
How to implement “fair data sharing by design”?
5. Conclusion

# ***What not to disclose in an FOI request?***

If **public interests** were harmed,  
e.g.

- State security
- Internal + ongoing processes for decision-making

If **private interests** were harmed,  
e.g. disclosure of

- Personal data
- Business secrets

Risks of accumulated disclosure may not be detectable for any single controller!

# Overview

1. Data sharing – new mindset from the EU
2. Learning from Freedom of Information practices
3. Risks ...
4. ... and safeguards:  
How to implement “fair data sharing by design”?
5. Conclusion

# *Assigning responsibilities (e.g. in the Schleswig-Holstein coalition agreement from 22.06.2022)*

7366 Die Bereitstellung öffentlicher Daten wird damit künftig zum entscheidenden Standortvorteil.

7367 Oft sind der Abruf und die Verwendung öffentlicher Daten mit Kosten verbunden, was

7368 insbesondere kleine Unternehmen und Start-ups vor erhebliche finanzielle Hürden stellt und

7369 das Schaffen von Wertschöpfung verhindert.

7370 Wir starten deshalb eine Landesdatenbereitstellungs- und -nutzungsoffensive, die neben dem

7371 Aufbau eines Kompetenzzentrums für Datenmanagement, in dem wir unser Daten-know-how

7372 bündeln wollen, einen weiteren Kern unserer künftigen Landesdatenstrategie bilden wird.

7373 In der Verwaltung erschaffen wir eine Datenkompetenz (Data Literacy) mit einer Kultur des

7374 Datenteilens und Datennutzens. Dazu werden wir in den Ressorts die Funktion einer oder

7375 eines Datenbereitstellungsnutzungsbeauftragten einführen und das Thema Datennutzung als

7376 verpflichtende Standardforbildung etablieren. Wir erkennen den verstärkten Bedarf an

7377 Mitarbeitenden mit Kenntnissen in Data Science und werden diese Kompetenzen in den

7378 Landesministerien in den kommenden Jahren weiter aufbauen.

*Data provision usage officers*  
**Daten / bereitstellungs / nutzungs / beauftragte**

Relevant: infrastructures, formats,  
standardised risk assessment etc.

# *Towards a systemisation of FOI by design*

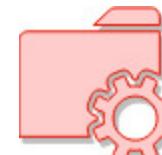

**1) Preparation:  
organisation of data  
according to risk  
concerning disclosure**

**2) Legitimacy  
check of access  
request**

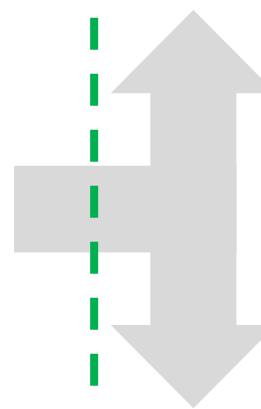

**3) Risk  
assessment,  
selection or  
aggregation**

**4) Management**

- Standardisation
- Open APIs
- Risk mitigation measures (ex ante, ex post)

**5) Check, audits**

Case handling

Generalisation

# *Bigger picture: Towards fair data sharing by design*

- Throughout the **entire data lifecycle**
- Organisation of data collection to provide **separability**
  - Metadata on “sharing possible with/without restrictions”
- Provision of restrictions for sharing or access if necessary
  - Selection, **pseudonymisation**, aggregation, anonymisation, ...
  - Synthetic data
  - Differential privacy
  - Homomorphic encryption
  - Secure multiparty encryption
  - Federated learning
  - **Data custodians** as neutral parties
- **Risk assessment:** ex ante, ex post

How to ensure the  
rights of the persons  
concerned?

# Overview

1. Data sharing – new mindset from the EU
2. Learning from Freedom of Information practices
3. Risks ...
4. ... and safeguards:  
How to implement “fair data sharing by design”?
5. Conclusion

Because of irreversible effects: choose positive progress instead of harmful haste

## Conclusion

“by design”

- ... for support of data providers and data users
- ... to avoid errors
- ... better than learning via “by disaster”

Source: Michael Ofurum via Pixabay

- Not only personal data, also **business secret data**
- **Linkage-enabling data** deserve closer attention
- **Holistic impact assessment** including ways to detect, understand and mitigate risks
