NIS²
Network & Information Systems Directive

CYBERSECURITY RISK MANAGEMENT MEASURES

Organisations are required to implement technical, operational, and organizational measures to effectively manage risks to their systems and minimize the impact of incidents. These must be based on an all-hazards approach and include at minimum the following:

- Policies on risk analysis and information system security
- Incident handling
- Business continuity and Crisis management
- Supply Chain Security
- Security in systems acquisition, development and maintenance
- Policies to assess the effectiveness of measures
- Basic cyber hygiene practices and training
- Cryptography and encryption
- Human resources security, Access control policies and asset management
- Use of multi-factor authentication and secured communications
- Secured communications
